communication which has led to the miniaturization of circuits. due to the reduced size and complexity of the circuits, signal integrity issues posed many challenges to the circuit designers. signal integrity is a measure of the quality of the electrical signal ... **suppression of radiation from high speed printed ...** - radiated emission is one of the major issues of signal integrity. radiated emission is the unintentional discharge of electromagnetic energy from an electronic device. radiated emission occurs when there is a via or a split or a bend in a trace. emission from one device may cause malfunction in the neighbouring device. the main source of radiated emission is common mode noise. common mode ... **reducing emi and improving signal integrity using spread ...** -
